The possibilities with 1-2-Taste ingredients for healthy drinks are endless. Together with our Beverage development partner PREfresco we developed two examples. Both **vegan, dairy-free and oat-based!** The 1-2-Tester Oat Drink - Fibre Boost is a non-dairy alternative to smoothies and drink yoghurts, containing a boost of fibre as well! If fibre is not your focus, do you 1-2-Go tropical? Try our 1-2-Tester Oat drink Banana-Baobab! Recipes will be shared with ordered bottles. And of course we can work with you to add your personal twist and signature for your winning brand. Availability per batch produced is limited, so order quickly to secure your 1-2-Tester bottle(s) of oat drink! **Order before June 29th - production starts shortly after.**
